PORTFOLIO

Cp Sales Tracker

CP Sales Tracker is a Flutter-based app designed for the pharmaceutical field to track salesmen's data, their visits, and live locations. Managers can also assign tasks to salesmen through the app. It uses GetX for state management and Oracle APEX RESTFUL APIs for the backend.

Fortline App

A customer management app in Flutter, integrated with Oracle APEX REST API, allows users to manage customer profiles, invoices, and products with features like authentication, detailed views, and real-time updates.

News App

A news app built with Flutter gives users the latest news and headlines, with an easy-to-use design and smooth browsing. It pulls news from News API to offer complete coverage.

Attendance App

An attendance tracking app built with Flutter marks attendance using the current location and locks the login to a single device, preventing multiple logins. It fetches and posts records via Oracle APEX REST API, ensuring secure and accurate attendance management.
